Education

Savitribai Phule Pune University, Pune Post Graduation	May 2025
Masters in Computer Applications (MCA)	
D. Y. Patil International University, Akurdi, Pune Graduation	June 2023
Bachelors in Computer Applications (BCA)	

Experience

Inorbvict Healthcare India Private Limited, Pune Software Developer Full-Time	May 2025 – Present
- Designed system blueprints and prototypes using Figma and Claude AI, enabling structured module development and reducing rework. - Designed and built key modules for a multi-tenant SaaS ERP (IDIMS), covering HRMS, CLM, Sales Matrix, and Warehouse/Inventory functionalities using React.js, Typescript and MySQL. - Managed Linux server environment, Docker images, and AWS networking configurations. - Designed and maintained CI/CD pipelines in Jenkins integrating Git (API tokens), SonarQube code quality analysis, automated testing, and Docker-based builds to streamline deployments. - Developed AI workflow automation using n8n, integrating ChatGPT, Claude APIs, and email services for automated communication flows. - Implemented core system logic for RBAC, Password Vault, and Maker–Checker–Approval (MCA) workflows.	
Inorbvict Healthcare India Private Limited, Pune Data Science Intern	Aug 2024 – Oct 2024
- Automated web scraping using Python to extract, clean, and export structured data for analysis. - Performed functional and usability testing for chatbots and CRM systems; tracked issues via Jira in Agile sprints. - Built and deployed a 100+ page business website on Figma, using user analytics to enhance design and UX. - Trained and tested AI chatbots for customer interaction, improving accuracy and user experience.	

Skills

- Backend:** Python, Node.js
- Frontend:** HTML, CSS, JavaScript, Tailwind CSS, React.js, TypeScript, Figma.
- Database:** MySQL, MongoDB.
- DevOps:** Git, GitHub, Linux, Bash, Shell Scripting, Docker, Kubernetes, Jenkins.
- Software Development:** Agile Methodology, Scrum, Jira.
- Cloud Technology:** Amazon Web Service - EC2 Instances, RDS, IAM, Auto Scaling, ELB, VPC, S3, EBS, EFS, NAT Gateway, Route table, Security Groups, Elastic Ips, CloudWatch.

Projects

3-Tier Web Application on AWS	Mar 2025 – April 2025
- Designed and implemented a production-grade three-tier architecture using Amazon EC2, Elastic Load Balancer (ELB), and Amazon Aurora (MySQL-compatible). - Hosted the React frontend on EC2 instances in a public subnet, with Nginx as a reverse proxy for optimized traffic handling. - Configured AWS Networking components: VPC, Security Groups, Route Tables, Internet Gateway, and NAT Gateway to ensure secure and efficient access control. - Used Amazon Aurora DB with a Read Replica setup across multiple Availability Zones for fault tolerance and high availability.	
AI Pose Estimation and Gym Tracker	Nov 2024 – Dec 2024
- Real-Time Pose Estimation: Utilized Media Pipe to capture and analyze human postures through live video feed. Implemented smooth scrolling and interactive elements to enhance user engagement and navigation. - Exercise Tracking: Enabled tracking of specific exercises (e.g., bicep curls) with detailed statistics such as repetition count, form score, and calorie estimation. - Interactive Web Application: Built using Flask to render real-time video feed and allow user interaction, such as starting/stopping tracking and setting fitness goals.	

Certification

- AWS Educate Introduction to Cloud 101
- AWS Educate Getting Started with Storage
- AWS Knowledge: Cloud Essentials
- Docker Foundations Professional Certificate by LinkedIn Learning.
